

**Alok Nanda**

CEO GE India Technology Centre  
CTO GE South Asia

As the CEO for GE India Technology Centre, Alok Nanda leads 5000+ engineers and scientists across multi-disciplinary R&D labs and industry verticals including Power, Aviation, Transportation, Healthcare and Renewables. Alok inspires collocated multi-disciplinary GE technology teams in India to create value beyond individual team potential.

In his role as the CTO for GE South Asia, Alok is responsible to drive regional business outcomes through innovative technology solutions and to maximize value for GE from the India ecosystem through strategic partnerships, monetizing IP and external funding.

Prior to his current role, Alok was the Chief Operating Officer at GE India Technology Centre, and General Manager for Engineering in India for GE Aviation. He developed and led an innovative and high-performing team to create deep technical impact across the GE Aviation business and established a successful Services Engineering organization in the region to support GE's key customers.

Alok has been with GE for about 19 years and has held engineering and technical leadership positions across Aviation, Power and Global Research. Prior to joining, GE, Alok spent eight years at the Indian Defense Research & Development Organization (DRDO).

Alok serves on the AMCHAM (American Chamber of Commerce) Executive Committee - Karnataka, India and is a member of the CII (Confederation of Indian Industry) National Innovation and Entrepreneurship Council, Expert Group on Technology, & Karnataka State Council.

Alok has a Masters degree in Mechanical Engineering from Indian Institute of Technology, Mumbai; and is based in Bangalore, India.
